

CLiQSMART® HV-30

Anti-Skin Agent

CLiQSMART HV 30 is a highly efficient new antioxidant for oxidatively drying non-aqueous systems. It is a user-friendly alternative to antioxidants, such as methylethylketoxim (MEKO), as it does not contain any CMR substances.

CLiQSMART HV 30 provides comparable efficiency against skin formation during storage to common antioxidants. It has limited influence on drying time and does not have a negative impact on gloss and yellowing.

Typical values:

Appearance:	clear liquid
Active content:	ca. 30 % in DPM
Density:	ca. 0.95 g/cm ³

Level of Use / Incorporation:

CLiQSMART HV 30 is easy to incorporate and can be added at any production stage. For optimised results, it is suggested to add the additive in the let-down stage after the driers.

The optimum loading level should be determined for each system. A loading between 0.50 – 2.00% based on the total is typically required to achieve the desired properties.

CLiQSMART HV-30 is recommended to store in a cool dry place above 5°C. The minimum shelf life is 24 months when stored in unopened original packages.

For information on health and safety information, please consult the Material Safety Data Sheet.
