

CLIQSMART® HM-1

Humectant

CLIQSMART HM-1 is an environmentally friendly VOC-free humectant for aqueous and universal pigment concentrates. The humectant inhibits drying of the concentrate, to prevent drying-out in tinting machines or during storage.

CLIQSMART HM-1 sufficiently replaces standard glycols in aqueous and universal pigment concentrates. It shows excellent paint compatibility with minimum influence on film hardness or moisture resistance of the final paint film at normal loading levels.

Typical values:

Appearance:	clear liquid
Active content:	100 %
Density:	ca 1.07 g/cm ³

Level of Use / Incorporation:

CLIQSMART HM-1 is used in pigment concentrates at loadings typically between 5 to 10% on total formulation. The required loading level depends strongly on the pigment nature and required humectant functionality.

CLIQSMART HM-1 is best added to the pigment grind to maximise efficiency. It shows a broad compatibility with different kind of dispersing and wetting agents.

CLIQSMART HM-1 should be stored in a cool dry place above 10°C. It may get cloudy and high viscous at low temperature storage, this does not impact the product performance.
