

CLiQSMART N-1 is a highly efficient amine based neutraliser for aqueous systems. The low odour additive shows also excellent wetting properties as co-dispersant.

CLiQSMART N-1 is used in both decorative and industrial paints to control the pH of the aqueous system. It enhances storage stability and does not cause pH drift on storage.

CLiQSMART N-1 is efficiently used as co-dispersant for aqueous highly concentrated inorganic pigment preparations and extender slurries to improve stability and performance.

Typical values:

Appearance:	clear liquid
Solids content:	90 %
Brookfield viscosity:	< 250 mPa.s
Density (20°C):	ca. 1.1 g/cm ³

Level of Use / Incorporation:

CLiQSMART N-1 is best dispersed with pigments and extenders for maximum efficiency as co-dispersant. It can be added at any production stage if used as neutraliser.

Depending on the nature of the pigment or extender a loading level between 0.5 and 5 % is recommended for pigment preparations.

CLiQSMART N-1 is compatible with most aqueous general industrial and architectural systems based on a variety of binder systems

CLiQSMART N-1 should be stored in a cool dry place. Closed containers can be stored up to 1 year.
