

## CLiQSPERSE® 124

### Wetting and Dispersing Agent

---

**CLiQSPERSE 124** is a highly efficient low foaming non-ionic wetting agent for aqueous systems. The labelling-free additive is used in modern VOC- and Ecolabel compliant base paints and colorants/pigment concentrates.

**CLiQSPERSE 124** is used as a compatibilizer in aqueous base paints to improve colour acceptance and tinting strength with aqueous pigment concentrates.

**CLiQSPERSE 124** is also used as a wetting agent in aqueous pigment concentrates to improve colorant acceptance and tinting strength. It enhances pigment wetting, reduces flooding and floating, and prevents re-flocculation of pigments on storage.

---

#### Typical values:

Appearance:	clear liquid
Active content:	90 %
Density:	ca. 1.02 g/cm <sup>3</sup>

#### Level of Use / Incorporation:

**CLiQSPERSE 124** is best dispersed with pigments and extenders for maximum efficiency. Depending on the pigment nature, a loading level between 2 and 15% is recommended for pigment concentrates. As compatibilizer in aqueous base paints, a loading level between 0.1-0.6 % is recommended.

**CLiQSPERSE 124** is compatible with most aqueous general industrial and architectural systems based on a variety of binder systems.

---

**CLiQSPERSE 124** is recommended to store in a cool dry place above 5°C. The performance is not impacted by lower temperature storage or freezing, but homogenization is recommended when re-heated. The minimum shelf life is 36 months when stored in unopened packages.

For information on health and safety information, please consult the Material Safety Data Sheet.
