

**CLiQSPERSE 126** is a highly efficient non-ionic pigment wetting agent for aqueous systems. The additive is an environmentally friendly labelling-free replacement to alkylphenol ethoxylate (APE) and used in modern VOC-compliant formulations.

**CLiQSPERSE 126** is used in pigment concentrates to improve colorant acceptance and tinting strength. It enhances pigment wetting, reduces flooding and floating and to prevents re-flocculation of pigments during storage.

**CLiQSPERSE 126** is also used in aqueous base paints to improve storage stability and compatibility with pigment concentrates.

## Typical values:

Appearance: clear to hazy yellow liquid

Solids content: 100 %

## Level of Use / Incorporation:

**CLiQSPERSE 126** is best dispersed with pigments and extenders for maximum efficiency. Depending on the pigment nature a loading level between 2 and 15 % is recommended for pigment concentrates. For paint formulations a loading level between 0.1-0.6 % is recommended.

**CLiQSPERSE 126** is compatible with most aqueous general industrial and architectural systems based on a variety of binder systems

**CLiQSPERSE EP 126** should be stored in a cool dry place. Closed containers can be stored up to 2 years.
