

## Safety Data Sheet Specialist

At CLiQ, it's all about collaboration and smart solutions. While our colleagues in the lab develop new formulas, you make sure these products can safely and legally enter the market. Your work ensures clarity and safety in a complex regulatory landscape.

### Who are we?

CLiQ SwissTech is an international company with a technical centre and office in Groningen. In 2022, we moved into our new premises on the Zernike campus. We also have locations in Germany, Italy and the USA.

Our focus is on the development and production of additives for paints, coatings and related industries. These high-quality products are developed in our Groningen laboratory and distributed to customers around the world.

The Product Stewardship department in Groningen ensures that our products comply with European and global chemical regulations, and provides clear regulatory information to both customers and colleagues.

### What will you be doing?

As Safety Data Sheet Specialist at our Product Stewardship department, you are responsible for authoring, updating, and managing European Safety Data Sheets (SDS) and labels, and related activities such as UFI/PCN notifications and C&L registrations.

Your main responsibility is to ensure compliance with European chemical regulations (REACH/CLP) by keeping these safety data sheets (including dangerous goods classification) and labels accurate and up-to-date, and by handling updates, storage, and archiving for related documentation.

You will be part of an international environment where quality, accuracy, and collaboration are essential. In the Product Stewardship team English is the main language of communication.

### Who are we looking for?

We are looking for someone with a higher professional (HBO) degree in Chemistry or a related science and it is very important that you have at least one year of relevant experience in authoring and managing Safety Data Sheets. Knowledge of EU-REACH and CLP is also required. It is an advantage if you also have experience with REACH-IT / IUCLID and Dangerous Goods regulations.

You combine scientific accuracy with clear communication. You can understand complex information and work precisely, even under time pressure.

Since we are an international organisation, fluency in both Dutch and English is important, and knowledge of German would be a plus.

At CLiQ, we believe talent comes in many forms. We welcome applications from people of all backgrounds, ages, and experiences. If you recognise yourself in this role and have experience managing Safety Data Sheets, but might not meet all other requirements, we still encourage you to apply, provided you believe your skills and motivation make you a good fit.

### Why choose to join our team?

CLiQ is a dynamic and continuously evolving company. You'll work in a specialised, close-knit team, with short communication lines and an open, professional atmosphere.

The culture at CLiQ is transparent and positive. Collaboration within and between departments is relaxed and constructive. We are committed to equal opportunities and a respectful workplace for all. Together, we deliver products and services we're proud of.

We value successes and celebrate them together: from small team challenges on the work floor to our yearly internal award ceremony. Humour, collegiality, and teamwork are part of daily life at CLiQ. New colleagues often feel at home quickly, and many stay because of the strong team spirit.

We offer competitive primary and secondary benefits, including an attractive pension scheme, 30 days of holidays per year, discounted lunches, and reimbursement of travel expenses. This position is available for 32 to 40 hours per week.

## Interested?

We believe a CV alone rarely gives a complete picture. We don't just want to know what you studied or which jobs you've had, but also why you made those choices, and why you want to work with us at CLiQ. Please send us your CV and add something that helps us get to know you better: a motivation letter, or for example a short video introduction.

You can apply via [human.resources@cliqswiss.com](mailto:human.resources@cliqswiss.com), addressed to Marjolein Blauwiekel, HR Officer.

If you have any questions about the vacancy, you can contact Marjolein Blauwiekel at the same email address or by phone at +31 (0)50 207 38 10.

## Privacy

By applying for this position, you consent to CLiQ processing the personal data you provide. Your data will be utilized for this application process and retained for potential future application processes. Should you object to the storage of your data for future purposes, please notify us at [human.resources@cliqswiss.com](mailto:human.resources@cliqswiss.com), and we will promptly remove your personal information.
